Dave Gerhardt Celebrates 10 Years with Leff Electric!

Dave started with Leff as an inside salesperson in Cleveland in 1996. He was quickly promoted to the Mentor Branch Manager. Dave lives in Mentor with his wife Heather, daughter Kaitlyn, and their dog, Trinity. He enjoys spending time with his family, and playing fantasy football and computer games in his spare time.

Congratulations Dave!

Leff Welcomes Lindsay Whelan!

Leff welcomed Lindsay Whelan as a Sales Assistant in July. Lindsay will support outside & inside sales, marketing, and the executive staff on sales related projects. Lindsay comes to us from Valvoline, where she was a Customer Service Representative and Assistant Manager. Lindsay lives in Painesville with her dog, Cane. She likes to play softball, fish, and spend time with her friends and family in her spare time.

Welcome Lindsay!

SmartLock PRO
Professional-Grade Protection

SmartLock*PRO*™ GFCI with Professional Grade Lockout Action

Building a Connected World
2006
LEVITON
1906
FOR OVER 100 YEARS

Coming Soon!
Meets 2006
UL Requirements

Earlier generations of GFCIs can be reset even though they are not providing ground fault circuit protection. With SmartLock*PRO*'s unique, patented end-of-life lockout action, users cannot reset the device when it fails to pass its test function, adding an extra measure of critical protection.

True Dead-Face Design with LED Indicator for Line-Load Reversals

If a SmartLock*PRO* GFCI is miswired during installation (line-load reversal), it cannot be reset, blocking delivery of power to its feed-through terminals and face. The GFCI is completely dead and the green LED will be ON to indicate a line-load reversal. Once the GFCI is wired properly and the unit can be reset, the LED acts as a power indicator that remains ON as long as the GFCI is operating correctly and providing power.

The SmartLock*PRO* End-of-Life Protection Advantage

The SmartLock*PRO* GFCI features Leviton's unique patented lock-out action as an end-of-life indication. If a SmartLock*PRO* GFCI is damaged so that it cannot respond properly to a ground fault, Leviton's SmartLock*PRO* GFCI prevents reset.

PowerMark Gold™ Generator Interlock Kit

With the PowerMark Generator Interlock Kit, there's no need for a separate generator panel. The kit contains everything needed to make an existing load center a generator panel. It's quick, it's easy and it saves time and money!

- **Converts any PowerMark Gold load center with a main breaker having a left-right handle orientation to be used as a generator panel**
- **Interlocks 4-pole main breaker with 2-pole branch breakers in breaker positions 2-4**
- **Compatible with any Mod 6 150-225A main breaker load centers**
- **Kit includes stainless steel interlock device, auxiliary main breaker retainer, assembly hardware, hole drill template, critical circuit identification labels**
- **UL listed**
- **Suitable for use in accordance with Article 702 of the National Electrical Code, ANSI/NFPA 70**

PowerMark Gold™ Load Centers

150-200 Amp 32/42 Circuit

Maximizes space by utilizing mini breakers to get 42 circuits in a standard 32 circuit panel.

- **42-space breaker capacity**
- **Right neutral bar has 40 holes**
- **Reduced need for additional field installed ground bars**
- **(20) 1/2" (THQP) positions with (22) 1" (THQL) positions remaining**
- **A new common interior on the 150-200 amp devices**
- **Single Phase, Three Wire, 120/240 VAC, 200 kAIC Rated**
- **UL Listed (Panelboards No. 67)**
- **60°C/75°C Conductor Rating**
- **Suitable for use as Service Entrance Equipment when installed in accordance with the National Electric Code**
