LEFF ELECTRIC

Family Owned Since 1921

MARCH 2005

Leff Is The Exclusive Stocking Distributor In Northern Ohio For 3M Medium And High Voltage Products

• Prep Kits • Glass Cloth Tape • Fire Arc Tape
• 5 and 15 KV Terminations and Splices
• Copper Shielding • Copper Braid

3M Cold Shrink QT-II and QT-III terminations are designed using 3M developed track resistant silicone rubber and Hi-K stress control material in conjunction with 3M's unique Cold Shrink delivery system. The QT-II and QT-III are supplied prestretched on a removable core. Removal of the core (unwind) after positioning the termination allows the product to shrink into position, providing a tight seal. 3M Cold Shrink terminations offer easy installation and reliable performance when terminating indoor and outdoor medium voltage cable. 3M offers you two options for choosing a Cold Shrink Termination. The QT-III utilizes the latest technology with built in Hi-K stress controlling mastic and silicone sealing mastic resulting in a much more user-friendly application. The QT-III offers many of the same advantages and benefits as the QT-II, but does require several additional steps during the installation. All terminations meet or exceed IEEE 48 requirements.

Cold Shrink Benefits

Lower Installed Cost
- Minimum training required
- All materials included in the kit
- Easy cable preparation
- Compact to fit into smaller equipment

High Reliability
- No heat, flames, or special tools needed
- Simple, straight forward installation
