LEFF ELECTRIC

October 2005

Family Owned and Operated Since 1921

Leff Welcomes Jeff Gleason

Leff welcomes Jeff Gleason to the Leff Electric team as the Distribution Equipment Specialist. He is responsible for project management and gear quotes. Jeff comes to us from Meech Static Eliminators as a Field Sales Account Manager. Prior to that he was a Sales Engineer Co-op for GE Industrial Systems. Jeff has a degree in Electrical Engineering.Jeff lives in Doylestown with his wife, Ashley and their two children, Baily (5 years old) and Saige (6 months old). He enjoys working on cars in his spare time. Welcome Jeff!

Leff Welcomes Jim Milligan

Leff welcomes Jim Milligan to the Leff Electric team as the National Accounts Manager. Jim comes to us from Lithonia Lighting, where he was a Regional National Accounts Manager. Prior to that, Jim was a top sales performer with Philips Lighting and Juno Lighting. He has developed a strong back-ground in lighting and lighting products. Jim is happy to be back in Cleveland (his home town) after 5 years in Atlanta. Welcome Jim!

Abby Lauer

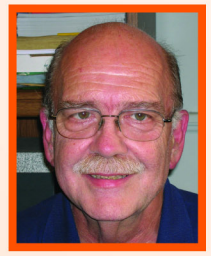

Celebrates 20 years with Leff!

Abby started with Leff 20 years ago as a computer operator. She was promoted to Accounts Receivable and then Credit/Collections Supervisor. Abby lives in South Euclid with her 12 year old son, Nick. She enjoys attending all of Nick's baseball and football games in her spare time. Congratulations Abby!

Rick Pegan

Celebrates 25 years with Leff!

Rick Pegan Started with Leff Electric in 1980 in the warehouse. He is in charge of receiving in the main warehouse in Cleveland. He lives in Parma with his girlfriend Sandi. He enjoys woodworking and golfing in his spare time. Congratulations Rick!

ModuLight™

Innovative Fluorescent Lighting System

This innovative lighting system provides dramatic savings in the design, installation, and re-configuration of commercial lighting. Maintenance costs are less too, including reduced energy. The "quick-connect" cabling system offers unsurpassed flexibility, simplicity and safety, creating a true Plug-and-Play lighting system.

Lower Operating Costs:

Up to a 4% annual savings in operating (energy) cost over current electronic ballast technology.

Lower Installed Costs:

- By mounting the Power Converter remotely from the fixture.
- Up to a 20-40% savings on installed costs.
- Conduit, wire, whip and associated components to the fixture are eliminated.
- Less materials are required, reducing materials expense and management / inventory costs.
- Trade conflict callbacks are virtually eliminated.
- ModuLight provides a six (6) year warranty on its power delivery system.

Flexibility

With ModuLight, only the Power Converters are installed during the rough-in phase. This innovative approach allows for:

- More time to design optimal lighting layouts.
- Ability to address last minute design changes without delay or penalty.
- Quick and easy fixture relocation for new tenants or space re-configuration.
- Could qualify for accelerated tax depreciation. (SECTION 179–CONSULT TAX ADVISOR OR ATTORNEY)

Ease of Use:

Reduces wiring labor:

- Cable assemblies in varied lengths.
- Field terminable components.
- Reduced fixture weight.
- Lightweight, flexible form-holding cable simplifies installation.
- No special tools required.

Safety:

Eliminates line voltage at the fixture making it safer to install, re-lamp, reconfigure, and replace.
