Bruce Leff Celebrates 30 Years with Leff!

Bruce began learning the ropes at Leff Electric when he was in high school by working in the warehouse and counter. He officially started working at Leff as an Outside Salesperson in May of 1976. After holding the position of Outside Sales and then Sales Manager, he became president in 1984. Bruce lives in Orange with his wife, Debbie. He enjoys golfing, skiing, and playing softball in his spare time. Congratulations Bruce!

JR Leff Celebrates 30 Years with Leff!

JR Leff started with Leff Electric as the Assistant Controller in September 1976. Prior to that, he was participating in Management Training at National City Bank. He then became the Controller, and now is the Vice President and Treasurer. JR lives in Chagrin Falls with his daughters, Danielle and Alexandra. He enjoys golfing, physical fitness, bicycling, and playing card games in his spare time. Congratulations JR!

Debbie Leff Celebrates 20 Years with Leff!

Debbie Leff started with Leff Electric in the LighTech division of lighting design in September 1986. Along with lighting design, Debbie conducts training classes for college students and serves on lighting judging panels. Just recently, she was one of the judges for "Lighting for Tomorrow" - a lighting design contest for energy efficient lighting. Debbie lives in Orange with her husband, Bruce. Congratulations Debbie!

LEFF ELECTRIC

Family Owned and Operated Since1921

Germicidal Lamps

UV lamps for germicidal applications. Water, air and surface sterilization.

GE Germicidal lamps use a special glass that transmits ultra-violet light in a spectral band that can be effective for sterilization. A proven technology for the destruction of air-borne bacteria, viruses and mold spores. Improved system efficiency when installed in HVAir Conditioning (HVAC) units by reducing bacterial and mold growth. The UVC wavelength of 254 nm will inactivate bacteria, viruses, mold, and cysts by preventing DNA replication. Available in linear fluorescent and compact fluorescent types.

Applications:

- ***Healthcare***
- ***Food Processing***
- ***Industrial, Municipal, Residential, Water and Pond Treatment***
- ***Commercial Buildings***
- ***Scientific Labs***

A new standard of reliability GENERAC® Generators

POWER SYSTEMS, INC.

IN STOCK!

MORE JOBS
BIGGER PROJECTS
HIGH PROFITS

• RESIDENTIAL • COMMERCIAL • LIGHT INDUSTRIAL

Enter to win a 50" Plasma Flat Panel TV with every $50 order.
Two winners - if you win, your favorite counter person will win too!

- ***Limit: One entry per invoice***
- ***Promotion period: September 1 - November 24, 2006***

Install Now Before the Cold Weather Hits!

EASYHEAT, INC. Electric Roof De-Icing Cable (ADKS)

IN STOCK!

- ***CSA Certified and UL Listed to Canadian safety standards.***
- ***Easy to install.***
- ***Approved for metal and plastic gutters.***
- ***Complete with clips and spacers.***

It's not those big icicles that do the real damage; it's the ice you don't see that backs up in gutters and under shingles. When the ice melts it can really do a number on repair costs. Easy Heat ADKS roof de-icing cable prevents this water and ice damage by providing a clear path for melting water to flow off the roof. The versatile design adapts to most roof and gutter configurations.

This product is intended for the sole use of preventing ice dams from forming on inclined roofs with tab shingles, in gutters and downspouts. This roof de-icing cable is not intended for use as a snow melting system to clear roof of ice and snow.

This system can be installed with confidence that it will operate for years without requiring service. All components are made of the highest quality material and are tested during critical points in the manufacturing process.

SR Trace® Freeze Protection Cable - IN STOCK

EASYHEAT, INC.

Easy Heat SR Trace® offers a perfect solution to cold weather related problems. Keeping pipes from freezing or eliminating ice dams on roof tops. SR Trace® is a self regulating heating cable engineered to vary its heat output as the surrounding temperature changes.

- ***The cut-to-length design allows for easy field sizing and installation.***
- ***All power densities are available from the factory in cut-to-order lengths or in easy to use 250 ft. self-dispensing reel boxes.***
- ***Specially designed installation and connection kits ease installation.***
- ***Eight specially designed kits provide the right hardware for properly installing SR Trace® self-regulating heating cables.***
- ***Since self-regulating heating cable varies its heat output in relation to the ambient temperature, a thermostat may not be necessary for some freeze protection applications. This feature also allows you to overlap the cable with no more overheating worries. As the surrounding temperature increases, the heat of the SR cable decreases. When the temperature decreases, the cable heat increases along the length of the cable.***

Nuevo Vallarta Trip Promotion

Double Bonus Points!

Receive double points for your purchases for the month of September with...

EGS Electrical Group — Appleton®

Trip promotion period: January 1 - December 31, 2006. Contact your salesperson or stop in at any Leff counter for a registration form.
